# Jonas Berg

## Senior Frontend Developer

Stockholm, Sweden · 9 years building fast, accessible product interfaces for web and design systems.

## PROFILE

Senior frontend developer with **nine years of experience** shipping customer-facing products in TypeScript and React. I specialise in design systems, web performance and accessibility, and I like working close to design and product to keep interfaces simple. Comfortable leading a small team, mentoring juniors and owning a frontend architecture end to end.

## EXPERIENCE

### Senior Frontend Developer

2021 — Present

Nordvik Digital · Stockholm · B2B analytics platform

- Led the rebuild of the reporting UI in React and TypeScript, cutting median page load from 4.1s to 1.3s (example figures).
- Designed and shipped a shared component library now used by four product teams, reducing new-screen build time by roughly a third.
- Introduced automated accessibility checks into CI; raised the main app from 68 to 96 on Lighthouse accessibility (example score).
- Mentored three mid-level developers and ran the fortnightly frontend guild.

### Frontend Developer

2018 — 2021

Ljus & Form · Stockholm · e-commerce agency

- Delivered storefronts for 12 retail clients on a shared headless commerce stack.
- Built the checkout flow used across client projects, lifting completed orders by 18% on the first launch (example figure).
- Set up the agency's first shared ESLint, testing and release conventions, later adopted company-wide.
